### EDUCATION

#### BSc.CSIT

[Texas International College](#)

📅 2020 - Present

#### +2 science

[Trinity International College](#)

📅 2019 - 2020

#### SEE

[Chandikaswory Secondary School](#)

📅 2005 - 2018

### SKILLS

Javascript

Typescript

React

NextJS

TailwindCSS

SCSS

GIT/Github

### TRAINING / COURSES

#### [React Training with projects](#)

Participated in a month long intense React training and enforcing it side by side in projects.

#### [Wordpress and SEO training](#)

Participated in a week long training of wordpress and SEO and applied it in a college project (E-commerce site)

### ABOUT ME

As a motivated and enthusiastic web developer, I am excited to apply my knowledge and skills to a position in web development. I am now seeking a good position where I can continue to grow and contribute to the success of the team.

### EXPERIENCE

#### Frontend Developer Intern

[WebX](#)

📅 02/2025 - 05/2025    📍 Lazimpat

Worked on multiple web projects using Next.js and Tailwind CSS, including travel websites and a bus booking system. Designed and developed full frontends with reusable components, dynamic pages, and smooth UI animations. Collaborated with backend developers to integrate APIs and ensure seamless data flow across the applications.

### PROJECTS

#### Mystic Adventures

🌐 <https://mynepaladventures.com/>

- Developed dynamic, responsive UIs with animated hero sections using GSAP and Framer Motion, along with interactive pages like package details, blogs.
- Integrated frontend with backend APIs for seamless booking flow and data updates, ensuring a smooth user experience.

#### Epeak Expedition

🌐 <https://epeak-beta.vercel.app/>

- Created reusable components (e.g., cards for packages) and implemented smooth navigation and state handling using Next.js and Tailwind CSS.
- Developed responsive UIs with smooth animations using GSAP and Framer Motion, along with dynamic pages like package details, blogs, etc.

#### Tansen Holidays

🌐 <https://tansen-holidays.vercel.app/>

- Developed dynamic and responsive UI with a real-time seat booking interface with dynamic routes like blog and package detail pages.

#### A real time chat app

🌐 <https://helou.onrender.com>

- A fullstack chat app build with MERN stack.
- My first fullstack project where I implemented various technologies such as socket io, jwt, bcryptjs for realtime communication and security.

#### Torrent Site

🌐 <https://movie-app-one-lilac.vercel.app/>

- I developed a web application using React, which is a clone of yts.mx, where one can search for movies using multiple filters and get links to download them and also watch trailers.
- I utilized API of yts to fetch data about movies.
